

# Nutrient Concentration & Water Reclamation System

By

**Digested**  
ORGANICS

**Ultrafiltration**

**Superfiltration**

**Reverse Osmosis**

**Biofilter**

*Digested Organics engineered and manufactured this advanced filtration solution to concentrate valuable nutrients and reclaim clean water.*

- ◆ 900,000 gallons of manure processed per day
- ◆ 11 contributing farm partners
- ◆ 400,000+ gallons of clean water discharged or reused
- ◆ At least 50% manure volume reduction for participating farms
- ◆ Thousands of manure truckloads eliminated

## Process Description
